

Where Machining Gets Automation

The **Automated Shop Conference (TASC)** is where machining gets automation! From discovering and evaluating leading technology and service suppliers like you to learning the strategies for successfully implementing automation across the production process.

As a sponsor and exhibitor, you will have the chance to showcase your latest automation innovations, equipment and services through table-top displays, high-visibility sponsorship packages and in-person networking – all in an intimate venue designed to help you make lasting connections.

TASC

THE AUTOMATED SHOP CONFERENCE

HYATT REGENCY | INDIANAPOLIS, IN
AUGUST 12-13, 2025

POWERED BY

PRODUCTION
Machining

WHY TASC, WHY NOW?

Automation is no longer a luxury in today's manufacturing environment and is instead essential for organizations that want to increase revenue and optimize workforce development. TASC 2025 will provide key insights and practical guidance for allowing shops of all sizes to attain automation solutions.

WHO WILL YOU MEET?

Interact directly with machine shop owners, managers, and technical leaders from small and mid-sized machine shops who are actively, or are on the edge of, transitioning to lights-out machining and automating mid- to high-volume production operations.

WHAT MAKES TASC UNIQUE?

The event is developed and moderated by *Modern Machine Shop* editors and team members – experts in reporting on the latest news and trends in automation and covering the topics that matter most to CNC machine shops.

IN PARTNERSHIP WITH

Space is limited. Reserve your
TASC 2025 sponsorship today.

Who Attends

Owners, executives and managers at CNC machining and metalworking businesses tasked with evolving their company's automation strategy. They attend to learn best practices and best processes for impacting every aspect of their business – from machining technology to shopfloor practices; sales and marketing to human resources – but, with a decided focus on automation.
